RESEARCH INTERESTS

Natural Language Processing (NLP) and **Large Language Models (LLMs)**, with a focus on reliable knowledge management across modalities in retrieval-augmented and agentic systems.

- **Retrieval-Augmented Generation (RAG) and Knowledge Conflict**
  - Evaluating how models retrieve, integrate, and use evidence when sources disagree or change over time
- **Agentic Memory**
  - Maintaining and updating long-term knowledge using multimodal evidence and applying it across tasks and interactions
- **LLM and Multimodal Model Evaluation**
  - Robustness, consistency, and failure analysis in knowledge-intensive tasks
